## Calculation Policy

Headteacher: Simon Bird  
Chair of Governors: David Hill

### Our Vision

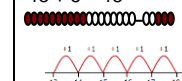

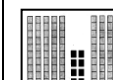

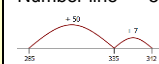

*At St Mark's CEP School, we ensure that our children are flourishing, building strong foundations, making excellent all-round progress and reaching their potential. We Aspire, Believe, Succeed*

**Created:** July 2020  
**Updated:** November 2023  
**Ratified:** 4<sup>th</sup> December 2023  
**Review date:** November 2026

St Mark's C of E Primary School - CALCULATION POLICY 2023 - Addition

STATUTORY EXPECTATIONS			Rapid Recall/Mental Calculations			Non-statutory guidance		
EY	Count ... from 1-20 ... and say which no. is 1 more than a given no. Using quantities objects, + two U nos and count on to find the answer. [Expected] Estimate no. of objects; check quantities by counting up to 20. [Exceeding]	Practical or recorded using ICT.  Hannah ... listed how many girls and how many boys were outside. [She] was able to say that "There are 5 girls and 4 boys. That's 9 altogether".  When playing in the shop Christopher used his shopping list to add 2 amounts. He said "the beans are 5 pence and the bananas are 3 pence, altogether that is 8 pence."  <a href="#">[EYFS Profile exemplifications. STA]</a>	Pictures/Objects  I eat 2 cakes and my friend eats 3. How many cakes did we eat altogether?  	Symbolic  8 people are on the bus. 5 more get on at the next stop. How many people are on the bus now  		Children are to record in their own ways and talk confidently about the maths they have done.		
Y1	Add (and subtract) one-digit and two-digit numbers to 20 (9 + 9, 18 - 9), including zero  Read/write/interpret statements involving addition (+), subtraction (-) and equals (=) signs.	<b>Pupils use concrete objects and pictorial representations</b> (eg place value counters, Dienes)  <i>Problems should include terms: put together, add, altogether, total, take away, distance between, more than and less than, so pupils develop concept of +/- and use operations flexibly.</i>	Practical/recorded using ICT  Pictures/Symbolic (see above)	Visual (modelled using bead strings)  $13 + 5 = 18$ 	Visual (efficient jumps)  $13 + 5 = 18$  [jumps may be in 1s]	Represent/use number bonds (and related subtraction facts) within 20.  Missing number problems (eg $16 = ? + 9$ )	<i>Memorise/reason with bonds to 10/20 in several forms (eg <math>9 + 7 = 16</math>; <math>16 - 7 = 9</math>; <math>7 = 16 - 9</math>). Pupils should realise the effect of adding or subtracting zero - establishes +/- as related operations.</i>  <i>Pupils combine and increase numbers, counting forwards and backwards.</i>	
Y2	<b>TO + O</b> <b>TO + tens</b> <b>TO + TO</b> <b>O + O + O</b>  [Show addition of two numbers can be done in any order.]	Recognise/use inverse relationship between +/- and use to check calcs and missing number problems.  <b>Pupils use concrete objects, pictorial representations and mental strategies.</b> (eg place value counters, Dienes)	Practical/visual images  $58 + 30 = 88$ 	Visual (efficient jumps)  $35 + 47 = 82$  <b>[Also jumps can be in 10s and 1s]</b>	No number line  $35 + 47 = 82$  $47 + 30 = 77$ $77 + 3 = 80$ $80 + 2 = 82$	Use known facts/partitioning  $8 + 5 + 13$  $8 + 2 = 10$ $10 + 3 = 13$	Partitioning  $35 + 47 = 82$ $40 + 30 = 70$ $7 + 5 = 12$	Recall and use addition facts to 20 fluently. Derive and use related facts up to 100.  Solve problems by applying increasing knowledge of mental methods.  <i>Pupils extend understanding of the language of + to include sum.</i>  <i>Practise + to 20 to derive facts such as using <math>3 + 7 = 10</math> to calculate <math>30 + 70 = 100</math>, <math>100 - 70 = 30</math> and <math>70 = 100 - 30</math>. Check calcs, including by adding numbers in a different order to check +. Establishes commutativity and associativity of addition.</i>
Y3	Use formal written methods of columnar addition.  <b>TO + TO</b> <b>HTO + TO</b> <b>HTO + HTO</b>	Number line $57 + 285 = 342$ 	No number line  $57 + 285 = 342$  $285 + 50 = 335$ $335 + 7 = 342$	<i>Recording addition in columns supports place value and prepares for formal written methods with larger numbers.</i>  $47 + 35 = 82$ 	<b>Expanded vertical</b>  	<b>Estimate answers and use inverse to check.</b>  $54 + 32 = 86$ $86 - 32 = 54$	HTO + O; HTO + tens HTO + hundreds  Use number facts and place value to solve problems.  <i>For mental calcs with TOnos, answers could be &gt;100.</i>	

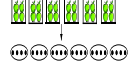

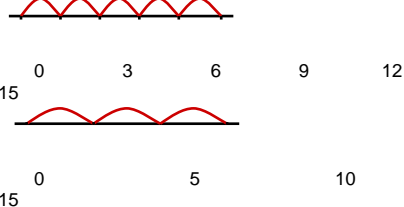

Y4	<p>Use <b>formal</b> written methods of <b>columnar addition</b>.</p> <p><b>HTO + HTO</b> <b>ThHTO + HTO</b> <b>ThHTO + ThHTO</b></p>	<p><b>Estimate and use inverse operations to check answers to a calculation.</b></p> <p>Estimate, compare and calculate different measures, including money in pounds and pence.</p>		<p><math>789 + 642 = 1431</math></p> $\begin{array}{r} 789 \\ + 642 \\ \hline 1431 \\ \hline 11 \end{array}$	<p><b>Solve addition two-step problems in contexts, deciding which operations and methods to use &amp; why.</b></p> <p>Solve simple measure and money problems involving fractions and decimals to 2dp</p>	<p><i>Pupils continue to practise both mental methods and columnar addition and subtraction with increasingly large numbers to aid fluency.</i></p>	<p><i>Pupils build on their understanding of place value and decimal notation to record metric measures, including money.</i></p>
Y5	<p>Add whole numbers &gt;4 digits, including using <b>formal</b> written methods (<b>columnar addition</b>).</p> <p>Decimals up to 2dp (eg <math>72.5 + 45.7</math>)</p>	<p>Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy. Solve addition multi-step problems in contexts, deciding which operations and methods to use and why.</p>	<p><b>Solve problems involving number up to 3dp.</b></p> <p><b>Solve problems involving converting between units of time. [Measurement]</b></p> <p><b>Use all four operations to solve problems involving measure [eg length, mass, volume, money] using decimal notation including scaling. [Measurement]</b></p>	<p><b>Compact</b> vertical</p> $\begin{array}{r} 23.70 \\ + 48.56 \\ \hline 72.26 \\ \hline 11 \end{array}$	<p><i>Pupils practise adding decimals, including a mix of whole numbers and decimals, decimals with different numbers of decimal places, and complements of 1.</i></p>	<p>Add numbers mentally with increasingly large numbers (eg <math>12462 + 2300 = 14762</math>).</p> <p><i>Pupils mentally add tenths, and one-digit whole numbers and tenths.</i></p>	<p><i>They extend their knowledge of fractions to thousandths and connect to decimals and measures. Pupils should go beyond the measurement and money models of decimals (eg by solving puzzles).</i></p>
Y6	<p>Solve multi-step problems in contexts, deciding which operations/methods to use and why. Decimals up to 3dp (Context: Measures)</p>	<p>Use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.</p>	<p>Use knowledge of the order of operations to carry out calculations involving subtraction.</p>	<p><b>Solve problems which require answers to be rounded to specified degrees of accuracy. [Fractions]</b></p> <p><b>Solve problems involving the calculation and conversion of units of measure, using decimal notation to 3dp where appropriate. [Measurement]</b></p>	<p><b>Compact</b> vertical</p> $\begin{array}{r} 3.243 \\ + 18.070 \\ \hline 21.313 \\ \hline 11 \end{array}$	<p>Perform mental calculations, including with mixed operations and large numbers. <i>Using the number line, pupils add positive and negative integers for measures such as temperature.</i></p>	<p><i>Pupils develop skills of rounding/estimating to predict/check order of magnitude of answers to decimal calculations. Includes rounding answers to a degree of accuracy &amp; checking reasonableness.</i></p>

**St Mark's C of E Primary School - CALCULATION POLICY 2023 - Subtraction**

STATUTORY EXPECTATIONS			Rapid Recall/Mental Calculations	Non-statutory guidance				
YR	<p>Count ... from 1-20 ... and say which no. is 1 less than a given no. Using quantities objects, subtract two O nos and count back to find the answer. [Expected] Estimate no. of objects; check quantities by counting up to 20. [Exceeding]</p>	<p>Practical or recorded using ICT.</p> <p>Chloe was playing in the maths area. "I need three more" she said as she added some cubes to the circle. She then realised she had more than her friend. "Oh, I have too many". She removed one. "Now we have the same".</p> <p>During a game of skittles outdoors Joseph knocked three numbered skittles down. He was able to calculate his score in his head. <a href="#">[EYFS Profile exemplifications. STA]</a></p>	<p>Pictures/Objects</p> <p>I have five cakes. I eat two of them. How many do I have left?</p> 	<p>Symbolic</p> <p>Mum baked 9 biscuits. I ate 5. How many were left?</p> 	<p><b>Decomposition</b> <b>1374 - 968 = 406</b></p> <p><small><math>\begin{array}{r} 1374 \\ - 968 \\ \hline 406 \end{array}</math></small></p> <p>Children are to record in their own ways and talk confidently about the maths they have done.</p>			
Y1	<p>Subtract (and add) one-digit and two-digit numbers to 20 (9 + 9, 18 - 9), including zero</p> <p>Read/write/interpret statements involving addition (+), subtraction (-) and equals (=) signs</p>	<p>Practical or recorded using ICT.</p> <p><b>Pupils use concrete objects and pictorial representations</b> (eg place value counters, Dienes)</p>	<p><b>Taking away</b> – jumps of 1 (modelled using bead strings)</p> <p>13 – 5 = 8</p>  	<p><b>Taking away</b> (efficient jumps) 13 – 5 = 8</p>  <p>No number line:</p> <p>13 – 3 = 10 10 – 2 = 8</p>	<p><b>Counting on</b> – jumps of 1 (modelled using bead strings) – finding the difference</p> <p>11 – 8 = 3</p>  	<p><b>Counting on</b> (efficient jumps)</p> <p>With, or without, number line</p> <p>8 + 2 = 10 10 + 1 = 11</p>	<p>Represent/use number bonds and related subtraction facts within 20.</p> <p><i>Problems should include terms: put together, add, altogether, total, take away, distance between, more than and less than, so pupils develop concept of +/- and use operations flexibly.</i></p> <p>Missing number problems (eg 7 = ? – 9)</p>	<p><i>Memorise/reason with bonds to 10/20 in several forms (eg 9 + 7 = 16; 16 - 7 = 9; 7 = 16 - 9). Pupils should realise the effect of adding or subtracting zero - establishes +/- as related operations.</i></p> <p><i>Pupils combine and increase numbers, counting forwards and backwards.</i></p>
Y2	<p><b>TU - U</b> <b>TU - tens</b> <b>TU - TU</b></p> <p>[Show subtraction of two numbers cannot be done in any order.]</p>	<p>Recognise/use relationship betw. +/- to check calcs and missing number problems.</p> <p><b>Pupils use concrete objects and pictorial representations and mental strategies</b> (eg place value counters, Dienes)</p>	<p>Practical/visual images</p> <p>95 - 60 = 35</p> 	<p><b>Taking away</b> 84 - 36 = 48</p>  <p><b>[Also jumps can be in 10s/1s]</b></p>	<p><b>Taking away</b> (no number line)</p> <p>84 - 36 = 48</p> <p>84 - 30 = 54 54 - 4 = 50 50 - 2 = 48</p>	<p><b>Counting on</b> 84 - 48 = 36</p> <p><b>Finding the difference</b> <b>[Also jumps can be in 10s/1s]</b></p> 	<p>Recall and use subtraction facts to 20 fluently. Derive and use related facts up to 100.</p> <p>Solve problems by applying increasing knowledge of mental methods.</p>	<p><i>Pupils extend understanding of the language of subtraction to include <b>difference</b>.</i></p> <p><i>Practise subtraction to 20 to derive facts such as using 3 + 7 = 10, 10 - 7 = 3 and 7 = 10 - 3 to calculate 30 + 70 = 100, 100 - 70 = 30 and 70 = 100 - 30. Check calculations, including by adding to check subtraction.</i></p>
Y3	<p>Use formal written methods of columnar addition</p> <p><b>TO - TO</b> <b>HTO - TO</b> <b>HTO - HTO</b></p>	<p><b>Counting on</b> 436 - 389 = 47</p> <p>Finding the difference</p> 	<p><b>Taking away</b> (no number line)</p> <p>326 - 178 = 148</p> <p>326 - 100 = 226 226 - 70 = 156 156 - 6 = 150 150 - 2 = 148</p>	<p>874 - 523 = 351 (no decomposition)</p>  <p>decomposition</p>	<p>Recording subtraction in columns supports place value and prepares for formal written methods with larger numbers.</p> <p>98 - 35 = 63</p> <p><small><math>\begin{array}{r} 90 \text{ and } 8 \\ 30 \text{ and } 5 \\ 60 \text{ and } 3 \end{array}</math></small></p> <p><b>Estimate answers and use inverse to check.</b></p>	<p>HTO - O HTO - tens HTO - hundreds</p> <p>Use number facts and place value to solve problems.</p>		

Y4	<p>Use formal written methods of <b>columnar subtraction</b>.</p> <p><b>HTO - HTO</b> <b>ThHTO - TO</b> <b>ThHTO - HTO</b> <b>ThHTO - ThHTO</b></p>	<p><b>Counting on</b> 1324 - 968 = 356</p> 	<p><b>Decomposition – use with place value mat to support</b></p> <p>932 - 457 = 475</p> 	<p>1000 and 300 and 70 and 4 - 900 and 60 and 8 ----- <b>Decomposition: 1374 - 968 = 406</b></p> <p>1800 and 60 and 14 - 900 and 60 and 8 ----- 400 and 0 and 6</p>	<p><b>Decomposition</b> <b>1374 - 968 = 406</b></p> 	<p><b>Solve subtraction two-step problems in contexts, deciding which operations and methods to use and why.</b></p> <p>Solve simple measure and money problems involving fractions and decimals to 2dp.</p>	<p><b>Estimate and use inverse operations to check.</b></p> <p>Estimate, compare and calculate different measures, including money in pounds and pence.</p>	<p><i>Pupils continue to practise both mental methods and columnar addition and subtraction with increasingly large numbers to aid fluency.</i></p>	<p><i>Pupils build on their understanding of place value and decimal notation to record metric measures, including money.</i></p>

Y6	<p>Solve multi-step problems in contexts, deciding which operations/methods to use and why. Decimals up to 3dp (Context: Measures)</p>	<p>Use knowledge of the order of operations to carry out calculations involving subtraction.</p> <p>Use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.</p>	<p><b>Solve problems which require answers to be rounded to specified degrees of accuracy. [Fractions]</b></p> <p><b>Solve problems involving the calculation and conversion of units of measure, using decimal notation to 3dp where appropriate. [Measurement]</b></p>	<ul style="list-style-type: none"> <li>There was 2.5 litres in the jug. Stuart drank 385 ml. How much was left?</li> <li>18.07 km - 3.243 km</li> <li>Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.</li> </ul>	<p>Perform mental calcs, incl. with mixed operations and large numbers. <i>Using the no. line, pupils subtract positive/negative integers for measures such as temperature.</i></p>	<p><i>Pupils develop skills of rounding/estimating to predict/check order of magnitude of ans to decimal calcs. Includes rounding ans to a degree of accuracy &amp; checking reasonableness.</i></p>			

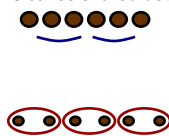

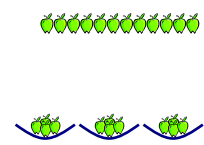

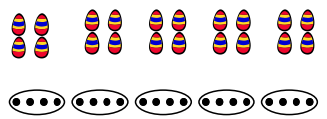

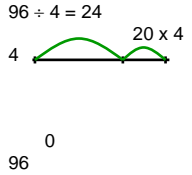

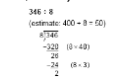

**St Mark's C of E Primary School - CALCULATION POLICY 2023 - Multiplication**

STATUTORY REQUIREMENTS					Rapid Recall/Mental Calculations	Non-statutory guidance						
YR	Children ... solve problems, including doubling, halving and sharing. [Expected] Solve practical problems that involve combining groups of 2/5/10. [Exceeding]	Practical/ recorded using ICT (eg digital photos / pictures on IWB)  How many 10p coins are here? How much money is that?  This domino is a double 4. How many spots does it have?	Pictures/Objects  How many socks in three pairs? 	Symbolic  3 pairs, 2 socks in each pair: 								
Y1	Solve one-step problems using concrete objects, pictorial representations and arrays (with the support of the teacher)	Practical/recorded using ICT Pictures/Symbolic  There are five cakes in each bag. How many cakes are there in three bags? 	Visual (eg modelled using bead strings)  5 x 3 or 3 x 5 [two, three times] or [three groups of two] 	Arrays  5 x 2 or 2 x 5 		<i>Doubling numbers/quantities</i>  <i>Count on/back in 2s, 5s and 10s</i>						
Y2	Calculate statements for multiplication within the multiplication tables and write them using the multiplication and equals signs. [Show multiplication of two numbers can be done in any order.]	Pictures/Symbolic  There are four apples in each box. How many apples in six boxes? 	Pupils use a variety of language to describe multiplication.  Repeated addition  5 x 3 or 3 x 5 	Arrays  6 x 4 or 4 x 6 	Recall and use multiplication facts for the 2, 5 and 10 multiplication tables, (including recognising odd and even numbers).  Use commutativity/inverse relations to develop multiplicative reasoning (eg 4 x 5 = 20 and 20 ÷ 5 = 4).	<i>Pupils ... practise to become fluent in the 2/5/10 multiplication tables and connect them to each other.</i> <i>They connect the 10x table to place value, and the 5x table to divisions on the clock face.</i> <i>They begin to use other multiplication tables and recall facts, including using related division facts to perform written and mental calculations.</i>						
Y3	Write/calculate statements using the multiplication tables that they know (progressing to formal written methods). <b>TU x U</b> (multiplier is 2/3/4/5/8/10)	36 x 4 = 144 <table border="1" data-bbox="358 1005 459 1045"><tr><td>x</td><td>30</td><td>6</td></tr><tr><td>4</td><td>120</td><td>24</td></tr></table>  120 + 24 = 144	x	30	6	4	120	24	30 x 4 = 120 6 x 4 = 24  36 x 4 = 144 	<i>Pupils develop reliable written methods for multiplication, starting with calculations of TU by U (progressing to formal written methods of short multiplication).</i>	Recall and use multiplication facts for the 3, 4 and 8 multiplication tables.	<i>Through doubling, they connect the 2/4/8 multiplication tables.</i> <i>Pupils develop efficient mental methods, using commutativity (eg 4 x 12 x 5 = 4 x 5 x 12 = 20 x 12 = 240) and multiplication and division facts (eg using 3 x 2 = 6, 6 ÷ 3 = 2 &amp; 2 = 6 ÷ 3) to derive related facts (30 x 2 = 60, 60 ÷ 3 = 20 &amp; 20 = 60 ÷ 3).</i>
x	30	6										
4	120	24										
Y4	Use formal written layout:  <b>TU x U</b> <b>HTO x U</b>  Convert between different units of measure [eg km to m; hr to mi]	43 x 6 = 258 (estimate: 40 x 6 = 240)  40 x 6 = 240 3 x 6 = 18	43 x 6 	342 x 7 = 2394 	47 x 36 = 1692 (estimate 50 x 40 = 2000) 	229 x 4 1000m = 200 + 4 = 1000 	342 x 7 = 2394 	Recall multiplication facts to 12 x 12. Use place value, known & derived facts to multiply mentally, including x by 0/1; x 3 numbers. Recognise/use factor pairs and commutativity in mental calculations.  <i>Pupils use multiplication to convert from larger to smaller units.</i>	<i>Practise mental methods and extend this to HTO numbers to derive facts, for example 200 x 3 = 600 into 600 ÷ 3 = 200.</i> <i>Write statements about equality of expressions [eg 39 x 7 = 30 x 7 + 9 x 7 and (2 x 3) x 4 = 2 x (3 x 4)].</i> <i>Combine knowledge of facts and arithmetic rules to solve mental/written calculations (eg 2 x 6 x 5 = 10 x 6 = 60).</i>			

Y5	<p>Use a <b>formal</b> written method (including long x for TO nos)</p> <p><b>TO x TO</b> <b>HTO x O / HTO x TO</b> <b>ThHTO x O</b></p> <p>Convert between units of measure (eg km/m; m/cm; cm/mm; kg/g; litre and ml)</p>	<p>27 x 34 = 918 (estimate 30 x 30 = 900)</p> $\begin{array}{r} 27 \\ \times 34 \\ \hline 108 \\ 810 \\ \hline 918 \end{array}$	<p>2741 x 6 = 16446 (estimate 3000 x 6 = 18000)</p> $\begin{array}{r} 2741 \\ \times 6 \\ \hline 16446 \end{array}$	<p>24 x 16 = 384 (estimate 25 x 15 = 375)</p> $\begin{array}{r} 24 \\ \times 16 \\ \hline 144 \\ 240 \\ \hline 384 \end{array}$	<p>124 x 26 = 3224 <b>see Y6!</b></p> $\begin{array}{r} 124 \\ \times 26 \\ \hline 744 \\ 2480 \\ \hline 3224 \end{array}$	<p><i>Pupils connect multiplication by a fraction to using fractions as operators (fractions of), and to division. This relates to scaling by simple fractions, including those &gt; 1. Find fractions of numbers and quantities, writing remainders as a fraction.</i></p>	<p>Identify multiples/factors, including finding all factor pairs of a number, &amp; common factors of two numbers. Know/use vocabulary of prime numbers, prime factors and composite (non-prime) nos. Establish if a number up to 100 is prime; recall prime numbers to 19. x nos mentally using known facts. Multiply whole numbers and those involving decimals by 10/100/1000.</p>	<p>Pupils ... <i>apply all the x tables frequently, commit them to memory and use them to make larger calculations. They understand the terms factor, multiple/prime, square/cube numbers &amp; use to construct equiv. statements (eg 4 x 35 = 2 x 2 x 35; 3 x 270 = 3 x 3 x 9 x 10 = 9<sup>2</sup> x 10).</i></p>
Y6	<p>Multi-digit numbers (up to 4 digits) x TO whole number using the <b>formal</b> method of <b>long multiplication</b>.</p> <p>Multiply one-digit numbers with up to two decimal places by whole numbers</p>	<p>256 x 18 = 4608 (estimate 250 x 20 = 5000)</p> $\begin{array}{r} 256 \\ \times 18 \\ \hline 2048 \\ 20480 \\ \hline 46080 \end{array}$	<p>124 x 26 = 3224</p> $\begin{array}{r} 124 \\ \times 26 \\ \hline 744 \\ 2480 \\ \hline 3224 \end{array}$ <p><b>[NB See Y5 method!]</b></p>	<p>4.7 x 8 = 37.6 (estimate 5 x 8 = 40)</p> $\begin{array}{r} 4.7 \\ \times 8 \\ \hline 37.6 \end{array}$ <p>[Or 47 x 8, then divide the solution by 10.]</p>	<p>5.65 x 9 = 50.85 (estimate 6 x 9 = 54)</p> $\begin{array}{r} 5.65 \\ \times 9 \\ \hline 50.85 \end{array}$ <p>[Or compute 565 x 9, then divide the solution by 100.]</p>	<p><i>Use a variety of images to support understanding of x with fractions. Use understanding of relationship between unit fractions and ÷ to work backwards by x a quantity that represents a unit fraction to find the whole quantity (eg if ¼ of a length is 36cm, whole length 36 x 4 = 144cm). x numbers with up to 2dp by U/TU whole nos (starting with simplest cases eg 0.4 x 2 = 0.8, and in practical contexts).</i></p>	<p>Perform mental calculations, including with mixed operations/large numbers. Identify common factors/multiples and prime numbers. Use knowledge of order of operations to carry out calculations. Use estimation to check answers to calculations and determine an appropriate degree of accuracy. Identify value of each digit to 3dp and x nos by 10/100/1000 (ans to 3dp)</p>	<p><i>Undertake mental calcs with increasingly large numbers and more complex calculations. Continue to use all x tables to calculate statements in order to maintain their fluency. Explore the order of operations using brackets. Common factors can be related to finding equivalent fractions.</i></p>

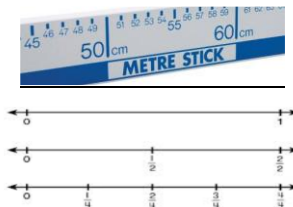

**St Mark's C of E Primary School - CALCULATION POLICY 2023 - Division**

STATUTORY EXPECTATIONS						Rapid Recall/Mental Calculations	Non-statutory guidance	
YR	Children ... solve problems, including doubling, halving and sharing. [Expected] They solve practical problems that involve sharing into equal groups. [Exceeding]	Practical / recorded using ICT (eg digital photos/pictures on IWB)	Pictures/Objects 6 cakes shared between 2  6 cakes put into groups of 2 	Symbolic 6 cakes shared between 2 	There are 8 raisins. Take half of them. How many do you have?  Share the 10 grapes between 2 people.			
Y1	Solve one-step problems using concrete objects, pictorial representations and arrays (with the support of the teacher)	Practical/recorded using ICT There are 14 people on the bus. Half of them get off. How many remain on the bus?  There are 20 people in the class. One quarter are boys. How many boys are there?	Pictures/Symbolic How many apples in each bowl if I share 12 apples between 3 bowls? 			Recognise/find/name 1/2 as one of two equal parts of an object, shape or quantity. Recognise/find/name 1/4 as one of four equal parts of an object, shape or quantity.	Find simple fractions of objects, numbers and quantities  Count on/back in 2s, 5s and 10s	
Y2	Calculate statements within the multiplication tables and write them using the division and equals signs. [Show division of two numbers cannot be done in any order.] Find 1/2, 1/4, 3/4, 3/4 of a length/object/quantity. Write simple fractions eg 1/2 of 6 = 3	Pictures/Symbolic Four eggs fit in a box. How many boxes would you need to pack 20 eggs? 	Pupils use a variety of language to describe division.	Visual (modelled using bead strings) $18 \div 3 = 6$  0 3 6 9 12 15 18	Arrays Find 1/4 of 24 $24 \div 4 = 6$ 	Partitioning $32 \div 2 = 16$ $20 \div 2 = 10$ $12 \div 2 = 6$	Recall & use division facts for the 2, 5 and 10 multiplication tables, Recognise/find/name/write fractions 1/2, 1/4, 3/4, 3/4 of a (length, shape), set of objects or quantity. Write simple fractions eg 1/2 of 6 = 3 and recognise equivalence of two quarters and one half. Use commutativity/inverse relations to develop multiplicative reasoning (eg $4 \times 5 = 20$ and $20 \div 5 = 4$ ).	Begin to use other multiplication tables/recall facts, including related division facts to perform written/mental calculations. Work with materials/contexts where division relate to grouping/sharing quantities. They begin to relate these to fractions/measures (eg $40 \div 2 = 20$ , 20 is a half of 40). They connect unit fractions to equal sharing and grouping, to numbers and to measures
Y3	Write/calculate statements using the tables that they know (progressing to formal written methods). <b>TO ÷ O</b> (divisor is 2/3/4/5/8/10)	$96 \div 4 = 24$  4 x 20 = 80 4 x 4 = 16 80 + 16 = 96	Multiples of the divisor $85 \div 5 = 17$ $10 \times 5 = 50$ $7 \times 5 = 35$	$51 \div 3 = 17$ 	Pupils develop reliable written methods for division, starting with calculations of TU by U numbers (progressing to formal written methods of short division).	Recall and use division facts for the 3, 4 and 8 multiplication tables.	Pupils develop efficient mental methods, using commutativity (eg $4 \times 12 \times 5 = 4 \times 5 \times 12 = 20 \times 12 = 240$ ) and multiplication and division facts (eg using $3 \times 2 = 6$ , $6 \div 3 = 2$ & $2 = 6 \div 3$ ) to derive related facts ( $30 \times 2 = 60$ , $60 \div 3 = 20$ & $20 = 60 \div 3$ ).	
Y4	Pupils practise to become fluent in the formal written method of short division with exact answers [NS] <b>TO ÷ O; HTO ÷ O</b>	Multiples of the divisor $98 \div 7 = 14$ $10 \times 7 = 70$ $4 \times 7 = 28$	$98 \div 7 = 14$ 	$252 \div 7 = 36$ $30 \times 7 = 210$ $6 \times 7 = 42$	$346 \div 8 = 43 \text{ r}2$ (estimate >40, <50) 	$252 \div 7 = 36$ 	Recall division facts to 12 x 12. Use place value, known/derived facts to ÷ mentally, including ÷ by 1. Find effect of dividing U/TU by 10/100, identifying the value of the digits in the answer as units/tenths/hundredths.	Practise mental methods and extend this to HTO numbers to derive facts, for example $200 \times 3 = 600$ into $600 \div 3 = 200$ . Relates decimal notation to division of whole number by 10 and later 100.

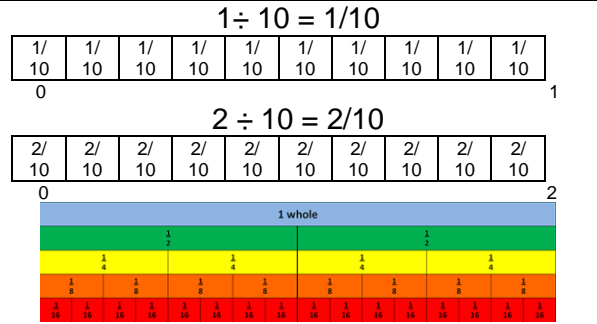

<p><b>Y5</b></p>	<p>Use the <b>formal</b> written method of <b>short division</b> (interpret remainders appropriately for the context).  <b>HTO ÷ O</b>  <b>ThHTO ÷ O</b></p> <p>Convert between units of measure (eg km/m; m/cm; cm/mm; kg/g; litre and ml)</p>	<p><math>291 \div 3 = 97</math>          (estimate: <math>270 \div 3 = 90</math>)</p> $\begin{array}{r} 90 = 7 \\ 3 \overline{)291} \phantom{=} \\ \underline{300} \phantom{=} \\ 91 \\ \underline{90} \phantom{=} \\ 1 \end{array}$ <p>This is then shortened to:</p> $\begin{array}{r} 97 \\ 3 \overline{)291} \end{array}$	<p><math>432 \div 5 = 86 \text{ r}2</math></p> $\begin{array}{r} 86 \text{ r}2 \\ 5 \overline{)432} \end{array}$ <p>(estimate: <math>400 \div 5 = 80</math>)</p>	<p><math>8520 \div 6 = 1420</math></p> $\begin{array}{r} 1420 \\ 6 \overline{)8520} \end{array}$	<p><i>Pupils connect x by a fraction to using fractions as operators (fractions of), and to ÷. This relates to scaling by simple fractions, incl. those &gt; 1. Find fractions of numbers and quantities, writing remainders as a fraction.</i></p>	<p>Identify multiples/factors, including finding all factor pairs of a number, &amp; common factors of two numbers. Know/use vocabulary of prime numbers, prime factors and composite (non-prime) nos. Establish if a number up to 100 is prime; recall prime numbers to 19. ÷ nos mentally using known facts. Divide whole numbers and those involving decimals by 10/100/1000.</p>	<p>Pupils ... <i>apply all the ÷ facts frequently, commit them to memory and use them to make larger calculations. They understand the terms factor, multiple/prime, square/cube numbers &amp; use to construct equivalent statements [eg <math>120 \div 15 = (30 \times 4) \div 15 = 2 \times 4 = 8</math>]</i></p>
<p><b>Y6</b></p>	<p>Divide numbers (up to 4 digits) by TO whole number using the <b>formal</b> method of <b>short/long division</b> (interpret as approp. for the context). Use written division methods in cases where the ans has up to 2dp.</p> <p><i>[Divide numbers up to 2dp by O/TO whole numbers.]</i></p>	<p><math>43.4 \div 7 = 6.2</math>          (estimate: <math>42 \div 7 = 6</math>)</p> <p><math>6 \times 7 = 42</math>  <math>0.2 \times 7 = 1.4</math></p>	<p><math>25.6 \div 7 = 3.2</math>          (estimate &gt;3, &lt;4)</p> $\begin{array}{r} 25.6 \div 8 \\ \text{(estimate: } 24 \div 8 = 3) \\ \underline{8)25.6} \\ -24.0 \\ \hline 1.6 \\ -1.6 \\ \hline 0 \end{array}$ <p>(8 = 3.0) (8 = 0.2)</p>	<p><math>43.68 \div 7 = 6.24</math>          (estimate: <math>42 \div 7 = 6</math>)</p> <p>[Or compute <math>4368 \div 7</math>, then divide the solution by 100.]</p> $\begin{array}{r} 6.24 \\ 7 \overline{)43.68} \end{array}$	<p><math>432 \div 15 = 28.8</math></p> $\begin{array}{r} 28.8 \\ 15 \overline{)432.0} \\ \underline{30} \phantom{.0} \\ 13 \phantom{.0} \\ \underline{12} \phantom{.0} \\ 12 \phantom{.0} \\ \underline{12} \phantom{.0} \\ 0 \end{array}$	<p><math>496 \div 11</math>          (estimate <math>500 \div 10 = 50</math>)</p> $\begin{array}{r} 45 \text{ r}1 \\ 11 \overline{)496} \\ \underline{44} \phantom{0} \\ 56 \\ \underline{55} \\ 1 \end{array}$ <p>Answer: <math>45 \frac{1}{11}</math></p>	<p>Perform mental calculations, including with mixed operations/large numbers. Identify common factors/multiples and prime numbers. Use knowledge of order of operations to carry out calculations. Use estimation to check answers to calculations and determine an appropriate degree of accuracy. Identify value of each digit to 3dp and ÷ nos by 10/100/1000 (ans to 3dp)</p> <p><i>Undertake mental calcs with increasingly large numbers and more complex calculations. Continue to use all table facts to calculate statements in order to maintain their fluency. Explore the order of operations using brackets. Common factors can be related to finding equivalent fractions.</i></p>

STATUTORY EXPECTATIONS

EY	No early years targets for fractions.		
Y1	<p>Recognise, find and name a half as one of two equal parts of an object, shape or quantity</p> <p>Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity</p>	<p>Children use their knowledge of fractions of shape to find fractions of quantities.</p> <p>Children should be give practical apparatus to find halves and quarters of quantities within 20.</p> <p>Record work pictorially.</p>	
Y2	<p>Recognise, find, name and write fractions <math>\frac{1}{2}</math>, <math>\frac{1}{4}</math>, <math>\frac{2}{4}</math> and <math>\frac{3}{4}</math> of a length, shape, set of objects or quantity</p> <p>Write simple fractions for example, of 6 = 3 and recognise the equivalence of <math>\frac{2}{4}</math> and <math>\frac{1}{2}</math>.</p>	<p>Children use their knowledge of unit and non-unit fractions of shapes to find fractions of quantities.</p> <p>They relate this to find fractions of a length e.g. <math>\frac{2}{4}</math> of 1m =</p> <p>Children need to relate finding a quarter to halving and halving again.</p> <p><i>Pupils should count in fractions up to 10, starting from any number and using the <math>\frac{1}{2}</math> and <math>\frac{2}{4}</math> equivalence on the number line (Non Statutory Guidance)</i></p>	<p>If I can see <math>\frac{1}{4}</math> how many quarters can you see?              If I can see <math>\frac{2}{3}</math> how many thirds can you see?              (Fraction strips)</p> 

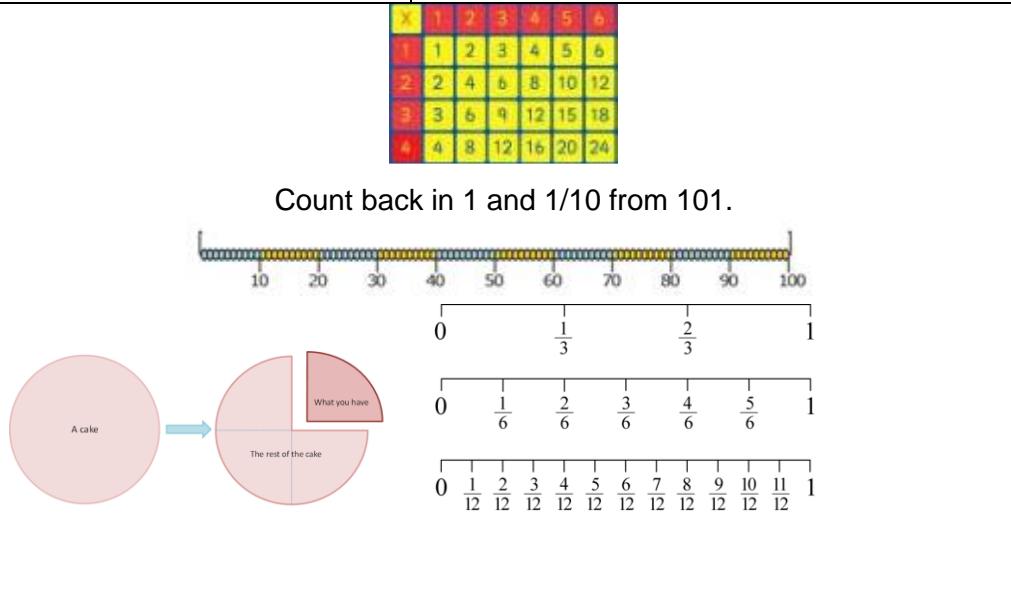

Count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one digit numbers or quantities by 10  
 Recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators  
 Recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators.  
 recognise and show, using diagrams, equivalent fractions with small denominators .

Encourage children to count up and down in tenths.  
 $1 \div 10 = 1/10$   
 $2 \div 10 = 2/10$   
 $3 \div 10 = 3/10$   
 Continue the pattern. What do you notice? What's the same? What's different?  
 Children can use fractions as an operator E.g.  $1/4$  of  $12 = 12 \div 4 = 3$   
 Children can relate fractions to the division of integers  
 $1 \div 4 = 1/4$   
 $4 \times 1/4 = 1$   
 $3 \div 4 = 3/4$   
 $3/4 \times 4 = 3$  ( $12/4$  or  $3/4 + 3/4 + 3/4 + 3/4$ )  
 Children need to relate and reason about why their diagrams are equivalent to a half – make connections between the numerator and the denominator E.g.  $1/2 = 4/8$   
 The numerator will be half of the denominator. Children should be encouraged to make the connection between their multiplication tables and equivalents. E.g.  $1/3 = 3/9$  because  $3 \times 3 = 9$ .  
 $5/7 + 1/5 = 6/7$   
 Children need to use practical resources/visual representations to support the comparison of fractions. E.g.  $1/3 > 1/4$   
 Children should also be taught how to order fractions on a number line.

Recognise and show using diagrams, families of common equivalent fractions.  
 Count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by tenths.  
 Solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number.  
 Add and subtract fractions with the same denominator.

$1 \div 100 = 1/100$   
 $2 \div 100 = 2/100$   
 $3/7$  of  $56 = 24$   
 $3/10$  of  $120 = 36$   
 $1/4 = 12$   
 $3/4 = \underline{\quad}$   
 $3/10 + 4/10 = 7/10$   
 $9/100 - 7/100 = 2/100$   
 Children can record on a number line equivalents between  $1/10$  and  $0.1$   
 Count on and back in tenths as decimals and relate to counting on/back in 10ths (fractions).  
 $25 \div 10 = 2.5$   
 2 ones and 5 tenths  
 $25 \div 100 = 0.25$   
 0 ones, 2 tenths and 5 hundredths or 25 hundredths

y5

Add and subtract fractions with the same denominator and denominators that are multiples of the same number.

Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.

$$\frac{3}{4} - \frac{1}{4} =$$

$$\frac{1}{10} + \frac{2}{5} =$$

$$\frac{2}{5} \times 2 =$$

I eat 1 more piece of this cake. What fraction would be left?

y6

Add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions.

Multiply simple pairs of proper fractions, writing the answer in its simplest form. Divide proper fractions by whole numbers.

$$\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}$$

$$\frac{1}{3} \div 2 = \frac{1}{6}$$
